

mlift

Non-stop urban connectivity.

Design and integration of exclusive building movement systems within expanding cities; further enhancing the quality of urban life.

Mastering the art of movement.

mlift Iraq was inaugurated in 2020 as a multi-disciplinary industrial enterprise specialized in providing comprehensive and innovative mobility solutions for buildings and environments.

We produce our own unique line of elevator and escalator systems under the mlift label. Our company's portfolio also integrates an exclusive range of international brands to include elevators, escalators, entrance solutions, building maintenance units and high-speed industrial doors.

Our core values center around integrity, professionalism and quality. We emphasize continuous commitment to customer service and maintenance as well as passenger safety, ensuring best practices at all levels and long-term client relationships.

We listen closely to our clients and extend to them our know-how to help provide insightful solutions for each project.

Uplifting relationships to another level.

From basic ideas to realizations, mlift works closely with its clients to structure an intricate schedule of planning from project management to engineering and installation.

We also extend support post-installation via ongoing regular scheduled service supervision and timely planned maintenance routines.

Our warehouse capability is resourceful in storing the most prevalent spare parts required during servicing and maintenance.

We efficiently expedite the replacement of any other major component necessary via our global supply networks.

Our after sales team will also gladly assist with any client requests pertaining to modernization or renovation needs.

Superior systems for efficient city life.

mlift Iraq believes in winning relationships with both clients and the environments in which we work and live in.

We make sure we do our share towards sustainability efforts universally – using only the most technologically advanced, energy efficient and ISO certified systems ensuring minimal negative environmental impact while promoting higher standards of city life.

Elevators and service lifts

mift **Focus on essentials.**

mift elevators offer simple, elegant, free-flowing cabin designs integrating superior quality performance machinery for a smooth and comfortable elevator ride.

Modern and energy efficient, mift elevators are built using premium quality materials, components and systems and offer a wide variety of materials, accessories, colours, surfaces and finishes.

Elevators and service lifts

mlift-e **Vertical convenience.**

The mlift-e elevator offers inspiring cabin designs integrating high performance motors and drives for conventional and non-conventional shaft sizes.

Created to offer better flexible solutions for structures with certain constraints – in particular narrow elevator shafts that are not within the standardized dimensions.

Simply designed, versatile and energy efficient, mlift-e is built for performance and sustainability in mind.

mlift-e gives you the choice of creating your personalized elevator cabin by offering a generous palette of colours, materials and textures to best suit your needs.

Elevators and service lifts

Cibes Lifestyle elevators.

The Cibes line of elevators incorporates 75 years of leading innovative Swedish elevator design. Stylized modular design for internal or external building use consisting of steel and aluminium framing integrating novel lift technologies that simplify the entire installation process.

Cibes elevators feature eco-silent drive system technology to reduce power consumption and noise output. Cabin platforms are also customizable to include a superior choice of novel accessories, colours, materials, textures and car operating systems.

Space-saving, easy integration, fast installation and quick to upgrade. In a nutshell, Cibes elevators offer the best of Scandinavian technology coupled with the best of Swedish intuitive and ergonomic design for home and business.

Elevators and service lifts
